

Swift Connectivity for Private Banks, Asset Managers, and Fund Managers in Asia Pacific

Seamless, Single, and Secure Access to Swift

Accessing financial networks carries heavy overheads, technical complexity, and high cost of ownership. These issues are exponential for private banks, asset managers and fund managers, whose connectivity requirements are often more specified than mainstream banks. The implications can mean institutions are weighed down by multiple solutions and complex internal processes.

Bottomline enables institutions to overcome these challenges with a comprehensive connection hub to Swift and other networks, via one platform. Offering a better experience for cross-border payments, whilst drastically reducing costs and streamlining operations.

Many private banks and asset and fund managers partner with Bottomline today, benefitting from our fully integrated financial messaging platform. Relied upon by the world's largest financial institutions, Bottomline's Connectivity Services enables complete visibility and control of the financial message settlement lifecycle as well as wider reach to other networks, and protection against fraud.

Top Swift service in APAC

Manage 15% of all Swift cross-border traffic

10 million Swift messages processed daily

How Can Bottomline Support You?

Market leading Swift Connectivity, Securities Management and Reconciliation with Bottomline's proven and high performance solution.

Swift Connectivity

Bottomline's complete solution, offers one-stop messaging and reconciliation. Clients gain direct connectivity to Swift, including gpi, Swift Go, BAV and several other services in preparation for Swift Essentials. Connect also to networks such as Visa B2B, UK Faster Payments, SIC, SEPA and Host-to-Host (H2H).

Swift connectivity lies at the very core of what we do. Bottomline is a leading Swift certified service bureau globally and is the top service bureau in APAC, as well as the leader for domestic payments in Switzerland and the UK.

The solution offers full compliance to ISO20022 messaging standards, harmonizing a disparate matrix of formats and protocols. Therefore ensuring complete interoperability between legacy, domestic and XML messaging standards. It supports high volumes and complex message flows from multiple counterparties.

Many private banks and asset and fund managers partner with Bottomline for complete Swift connectivity.

Securities Management

With more than half of Swift traffic relating to securities settlements, having a consolidated view of the securities settlement lifecycle is essential to operational efficiency and success.

The post-trade securities lifecycle requires settling transactions via multiple networks and counterparties, all of which encounter different security and technical requirements.

Bottomline empowers complete visibility across networks, geographies, and systems, and management of corporate actions notifications (incl. SRD II). Ensure failures are prevented, and address exceptions, remove manual intervention and enhance customer experience.

Reconciliation

Failed trades, partial settlements and discrepancies between cash and security holdings can have real implications on performance, client experience and efficiency. With Bottomline, clients can reconcile trades, as well as positions, cash balances and cash activities for ground-breaking enterprise-wide understanding of all business lines and market instruments. Full visibility dramatically improves operational efficiency while reducing risk exposure.

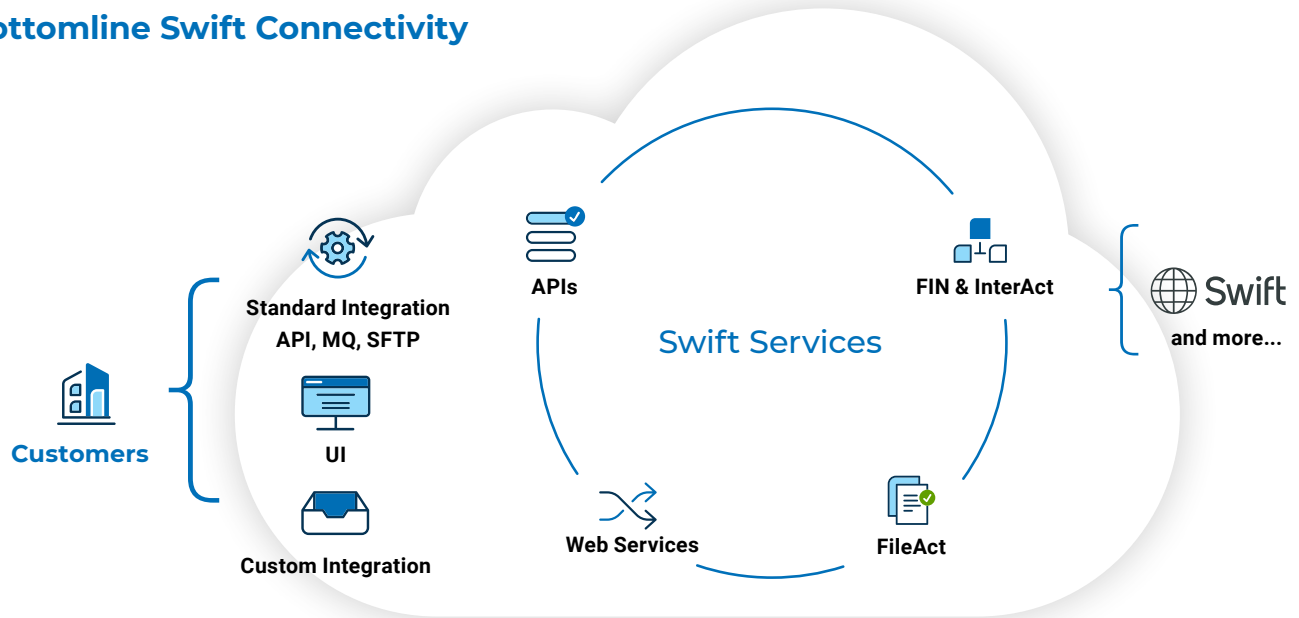

Clients can utilize Bottomline's matching and reconciliation solution to provide complete visibility of your payments, cash, and securities positions.

What Is The Value of Bottomline's Swift Connectivity

Bottomline's Swift connectivity includes the following benefits:

- ✓ **Continuous and reliable:** 24/7 connectivity to Swift and other networks.
- ✓ **ISO 20022 ready:** Bottomline platforms are enabled with the ISO 20022 standard.
- ✓ **High-level payment view:** Group all messages together for a holistic, transparent view of your payments, across all schemes.
- ✓ **Effortless message processing:** Manage the complete end-to-end lifecycle of messages.
