

# It Pays to Supplement Your Existing Payments Programs

See how Paymode for Digital Banking can boost your bottom line

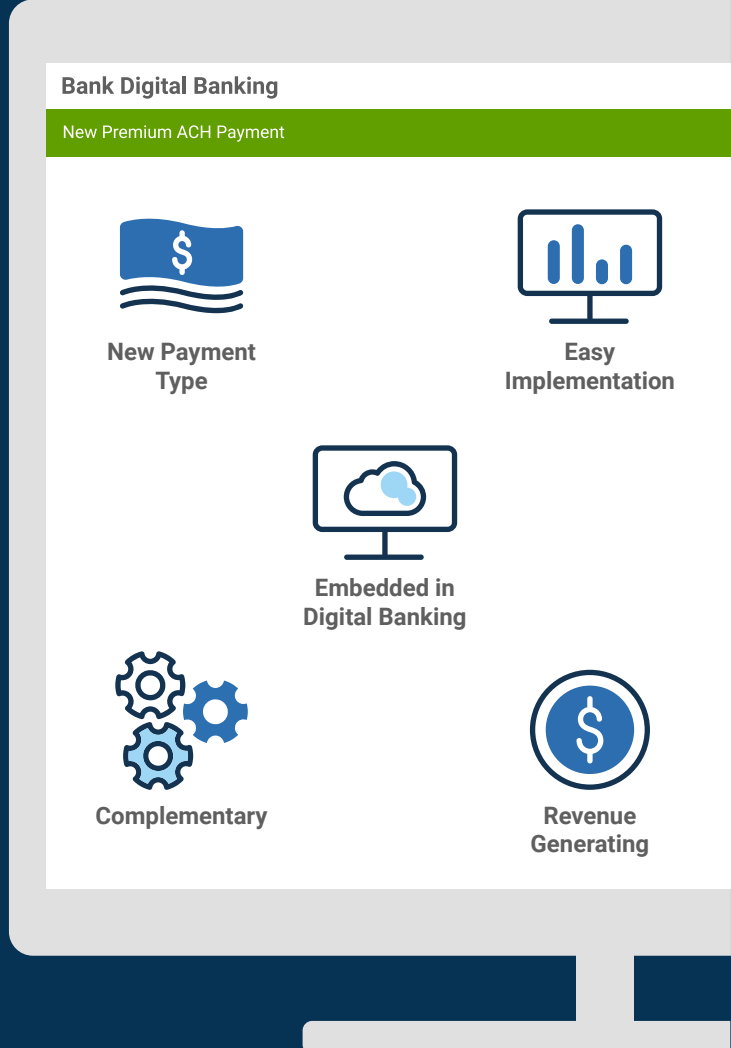

## The Network Affect

Your business customers pay their vendors with payment methods like checks, ACH payments, and credit cards. Your bank already earns fee income from credit card payments, why not also tap into revenue from traditionally low-value ACH payments?

**With Paymode for Digital Banking you can.**

Enhance your revenue stream without disrupting your existing ones with a new payment type through Paymode, Premium ACH. Each participant of this payment type reaps the rewards because Paymode is a vendor-funded network. Your bank and business customers (payers) earn rebates, while both payers and vendors enjoy secure payments. Plus, the transactions are completed within the familiar commercial digital banking interface your business customers use today.

Let's break down the benefits for you, the payers and their vendors and see an example of the potential income you could earn from this unique solution.
